CONTENTS OF VOLUME 23

Number 1, January 1977

C. K. Forester. Higher Order Monotonic Convective Difference Schemes 1

A. A. Mirin, J. Killeen, K. D. Marx, and M. E. Rensink. A Radial Transport/Fokker–Planck Model for a Tokamak Plasma. 23

S. B. Cox and J. L. Fry. Convergence of Reciprocal-Lattice Sums: Exact Formulas for the Ewald Method. 42

R. Mejia, R. B. Kellogg, and J. L. Stephenson. Comparison of Numerical Methods for Renal Network Flows 53

J. C. Eilbeck and G. R. McGuire. Numerical Study of the Regularized Long-Wave Equation. II: Interaction of Solitary Waves 63

Notes

P. Hillion and G. Nurdin. Integration of Highly Oscillatory Functions 74

Herbert E. Salzer. A Variable Coefficient Extension of a Formula for Series Conversion 82

Jean-Pierre Matte and Gaétan Lafrance. Solution of the Discrete Poisson Equation with Complicated Boundaries 86

Number 2, February 1977

A. Talmi and G. Gilat. Method for Smooth Approximation of Data. . . . 93

James M. Hyman. Mesh Refinement and Local Inversion of Elliptic Partial Differential Equations. 124

Michael C. MacCracken and Robert D. Bornstein. On the Treatment of Advection in Flux Formulations for Variable Grid Models, with Application to Two Models of the Atmosphere. 135

A. Holas. Numerical Integration over the Solid Angle and Volume of the Brillouin Zone. 150

Rangarao V. Madala and Steve A. Piacsek. A Semi-Implicit Numerical Model for Baroclinic Oceans. 167

Gary A. Sod. Eigenvalues and Eigenfunctions of the Hilbert Operator. . . 179

G. M. Torrie and J. P. Valleau. Nonphysical Sampling Distributions in Monte Carlo Free-Energy Estimation: Umbrella Sampling. 187

J. Engels and J. Fleischer. Evaluation of Phase-Space Volumes and Inclusive Spectra in the Uncorrelated Jet Model. 200

Number 3, March 1977

Thomas H. Johnson, John Killeen, Oscar A. Anderson and Marvin E. Rensink. Guiding-Center Simulation of Toroidal Plasmas. 219

M. M. Shoucri and R. R. J. Gagné. A Multistep Technique for the Numerical Solution of a Two-Dimensional Vlasov Equation. 242

Bram van Leer. Towards the Ultimate Conservative Difference Scheme. III. Upstream-Centered Finite-Difference Schemes for Ideal Compressible Flow. 263

Bram van Leer. Towards the Ultimate Conservative Difference Scheme. IV. A New Approach to Numerical Convection 276

J. Busnardo-Neto, P. L. Pritchett, A. T. Lin, and J. M. Dawson. A Self-Consistent Magnetostatic Particle Code for Numerical Simulation of Plasmas. 300

J. A. Désidéri and J. C. Tannehill. Over-Relaxation Applied to the MacCormack Finite-Difference Scheme 313

Jean-Paul Ryckaert, Giovanni Ciccotti, and Herman J. C. Berendsen. Numerical Integration of the Cartesian Equations of Motion of a System with Constraints: Molecular Dynamics of *n*-Alkanes. 327

Number 4, April 1977

Tin-Kan Hung and Thomas D. Brown. An Implicit Finite-Difference Method for Solving the Navier–Stokes Equation Using Orthogonal Curvilinear Coordinates 343

Arthur L. Schoenstadt. The Effect of Spatial Discretization on the Steady-State and Transient Solutions of a Dispersive Wave Equation. 364

F. Milinazzo and P. G. Saffman. The Calculation of Large Reynolds Number Two-Dimensional Flow Using Discrete Vortices with Random Walk. 380

José Canosa and Jenö Gazdag. The Korteweg–de Vries–Burgers Equation . 393

J. A. R. Coope and D. W. Sabo. A New Approach to the Determination of Several Eigenvectors of a Large Hermitian Matrix. 404

John Reif and Richard Barakat. Numerical Solution of the Fokker–Planck Equation via Chebyschev Polynomial Approximations with Reference to First Passage Time Probability Density Functions. 425

Note

W. E. Jones, G. Matinopoulos, and J. S. Wasson. The Truncated Kullback Statistic as an Objective Function for Fitting Partially Known Probability Vectors. 446

Erratum 452

Author Index for Volume 23. 453
